

Matpack P50 Powered Turntable

The P50 is a powered turntable designed to reduce operator fatigue and safety hazards, during the manual wrapping of pallets of goods.

The table simply rotates the pallet for the operator who then can stand in one spot and wrap the pallet with greater control and consistency.

Simple foot switch operation makes the P50 highly suitable for almost any application, with no complicated training required. With the speed adjustment controller, it is easy to set your wrapping speed to suit whatever is being wrapped.

Speed adjustment controller (underneath unit).

Specifications

Diameter	1200mm	Height	350mm
Motor power	0.75Kw	RPM	10
Power supply	230V/1 ph/50 Hz	Rotation	Anti-clockwise (clockwise optional)
Motor control	Footswitch	Drive method	Friction wheel
Load capacity	1500kgs	Wrapping device	Handheld dispenser
